

Germania Mutual Communication Plan

Germania Mutual is committed to ongoing and complete communication with respect to the COVID 19 pandemic. Communication includes education and notification of changes and expectations. All community communication will be posted on the Germania website.

Daily Symptom Screening

As per the Ontario Minister of Health, all staff and patrons are required to complete COVID 19 screening prior to entering the work place. For staff, Germania uses a template that employees can access from the staff part of the website. For patrons, a paper copy is available. Patrons and staff are guided through the government questions and are provided with instructions based on the absence or presence of symptoms consistent with COVID 19. The screening is assessed each day by the Executive Administrative Assistant. Anyone who answers yes to any of the symptoms will be asked to contact Public Health for further instruction.

Infection Prevention and Control

Ongoing communication with the community is important in the fight against COVID 19. Germania Mutual has been communicating regularly through our G-Talks, targeted communication to employees, and the website that shares our complete safety plan.
